

Products For Improved Wafer Processing

Products:

- ❖ SSL Series: Carrier and Pre-mix Slurry
 - Available world-wide in 1000 liter IBC, 200 liter drums

Product Description:

- ❖ Superior system with advanced particle dispersion chemistry that:
 - provides long-term stable abrasive slurries for wire saw applications
 - eliminates and prevents formation of solids agglomerates
 - provides uniform wire coating
- ❖ Based on Polyethylene Glycol (PEG-200), non-foaming, environmentally friendly, recyclable

Major Markets:

- ❖ Solar, Semiconductor, Opto-electronics

Benefits:

- ❖ Increased Yield and Improved Wafer Surface Finish
- ❖ Enables Use of Finer Wire
- ❖ Reduced Slurry Usage
- ❖ Reduced Slurry Preparation Time and Saw Cleans
- ❖ Reduced Caustic Etch Usage
- ❖ Reduced % Abrasive in Slurry
- ❖ Reduced Energy Usage in Wire Saw
- ❖ Enables long-term storage of pre-mix slurry
